# How to Install Canva on Windows

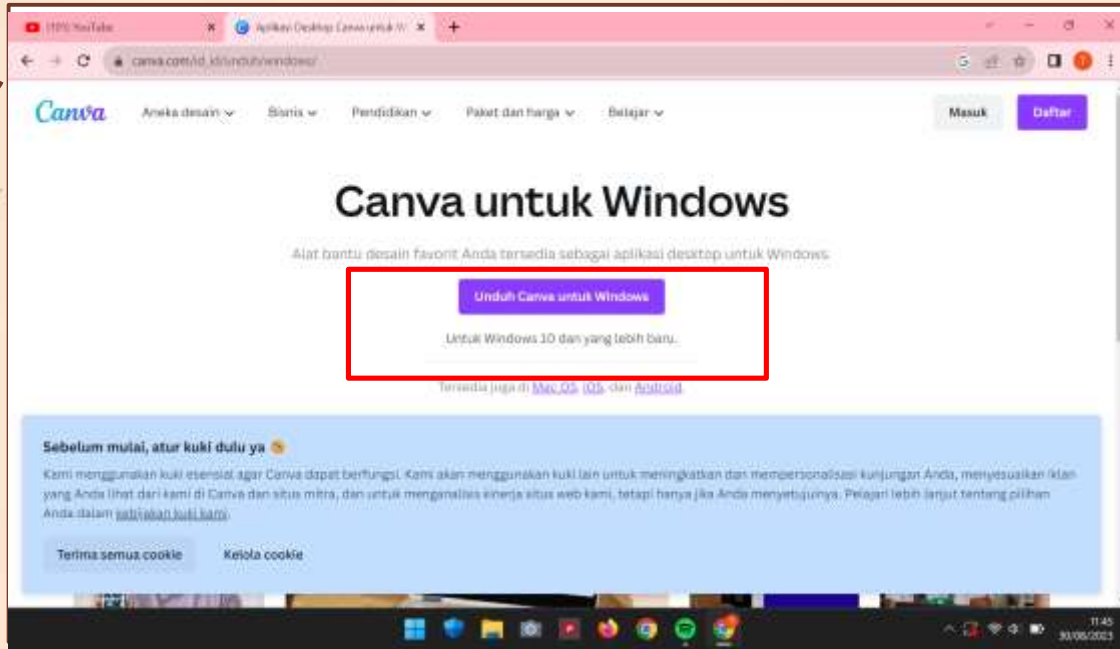

First of all, open a browser or other search engine such as Google or Chrome. Then, search for "Canva download" then click on the website

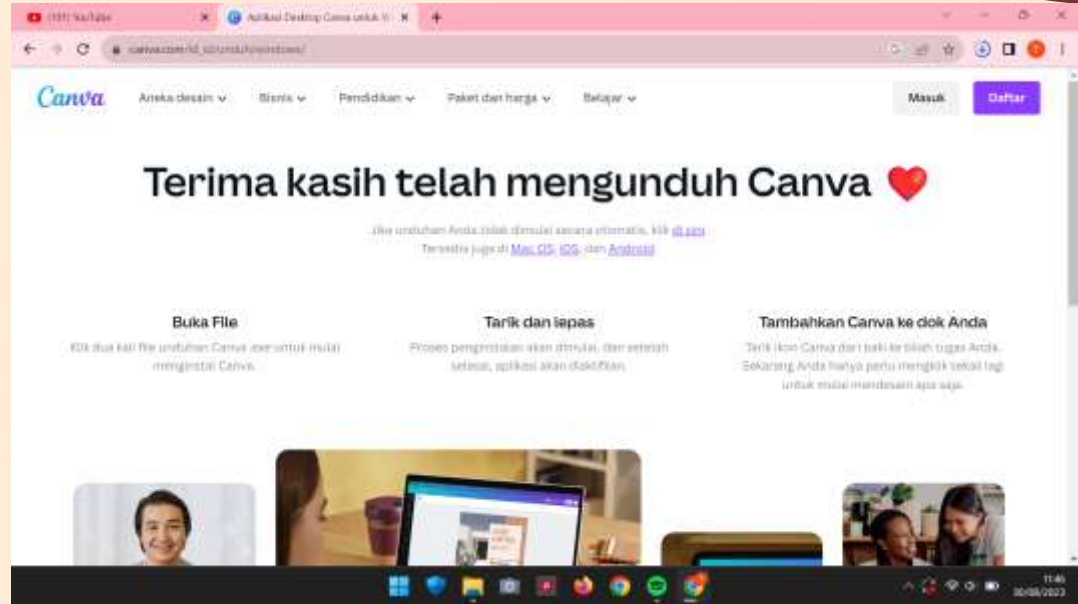

Source: canva.com

After that, you  
can  
immediately  
see the  
sentence  
"download  
Canva for  
Windows".  
And then, just  
click on it

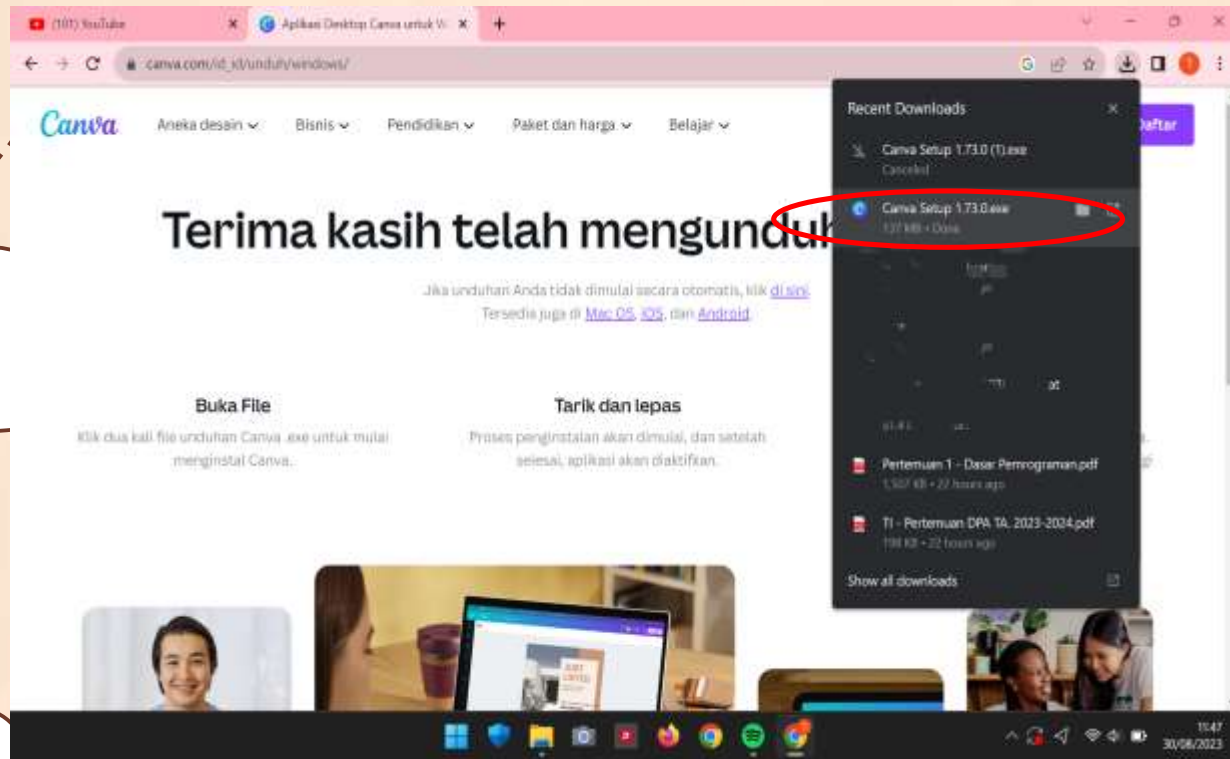

Source: [https://www.canva.com/id\\_id/unduh/windows/](https://www.canva.com/id_id/unduh/windows/)

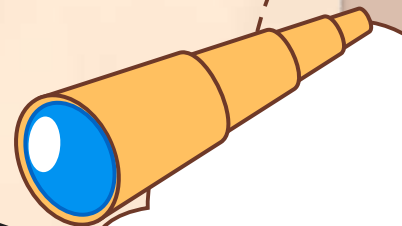

After click, it will say  
"Thank you for  
downloading Canva"  
and your application  
will enter the  
download process

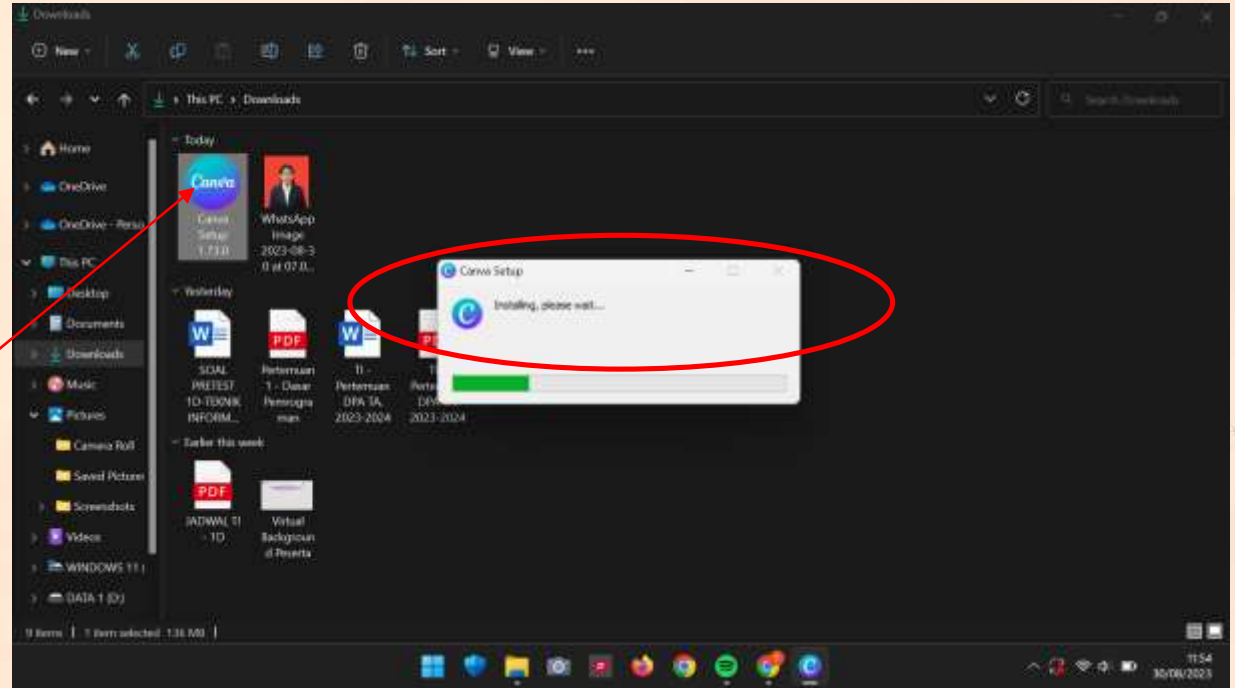

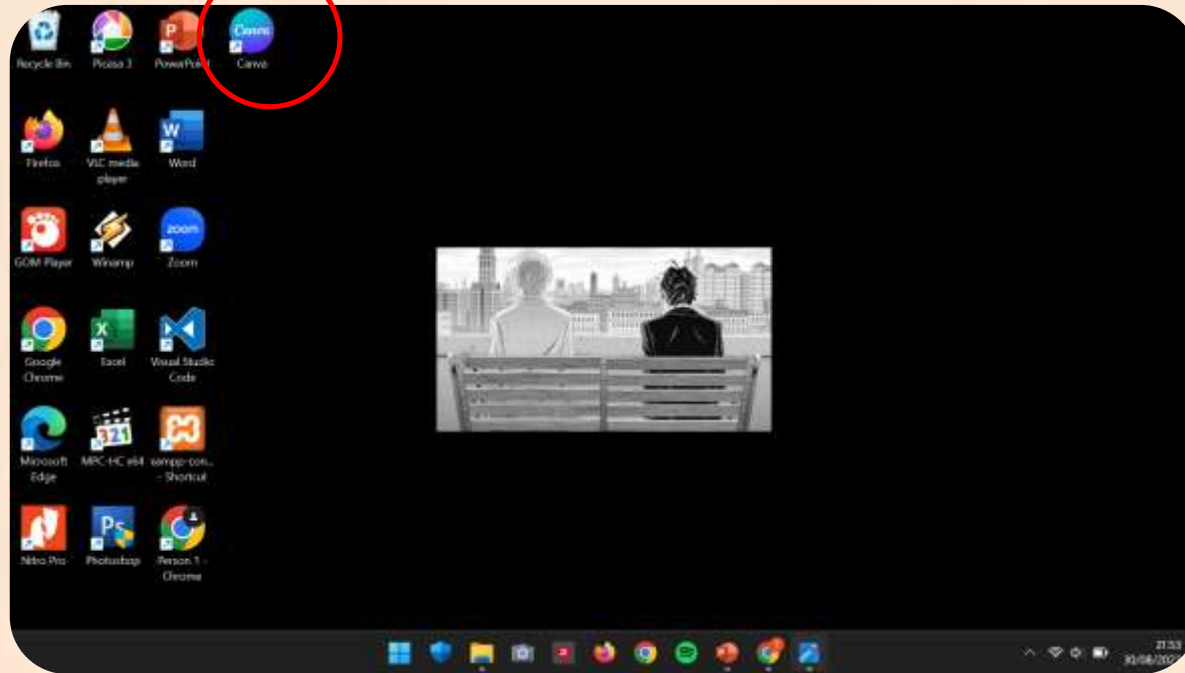

After the download process, your application will appear on the download icon

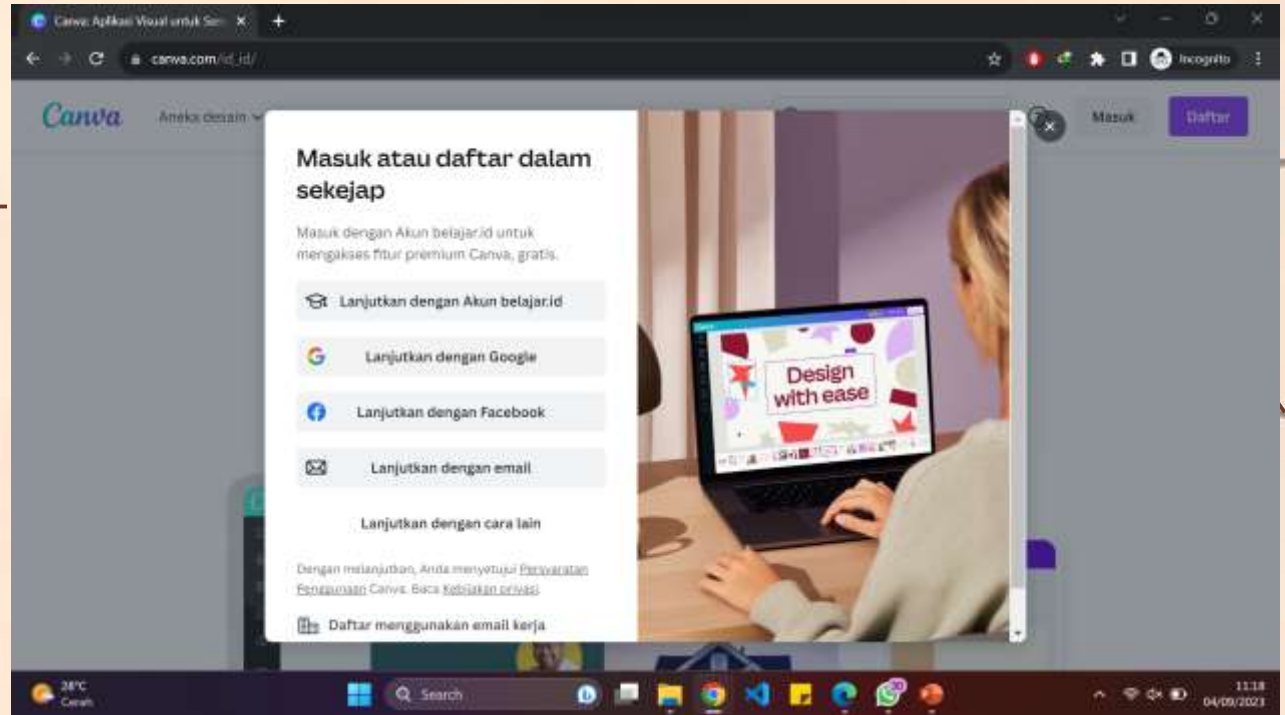

After that, you can open the folder and immediately install or run the application, by double-click on the application file

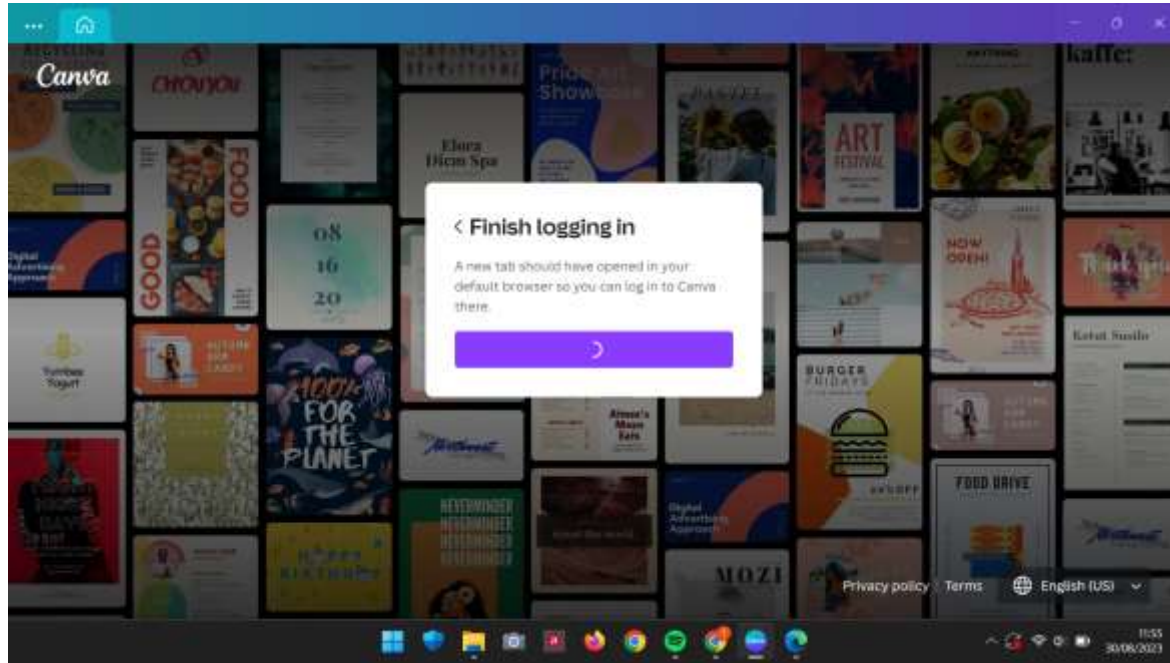

**When the  
download  
process is  
complete, the  
application  
icon will appear  
on your desktop**

Then, you  
can click on  
the  
application  
icon. After  
that, log in or  
register with  
a Google  
account

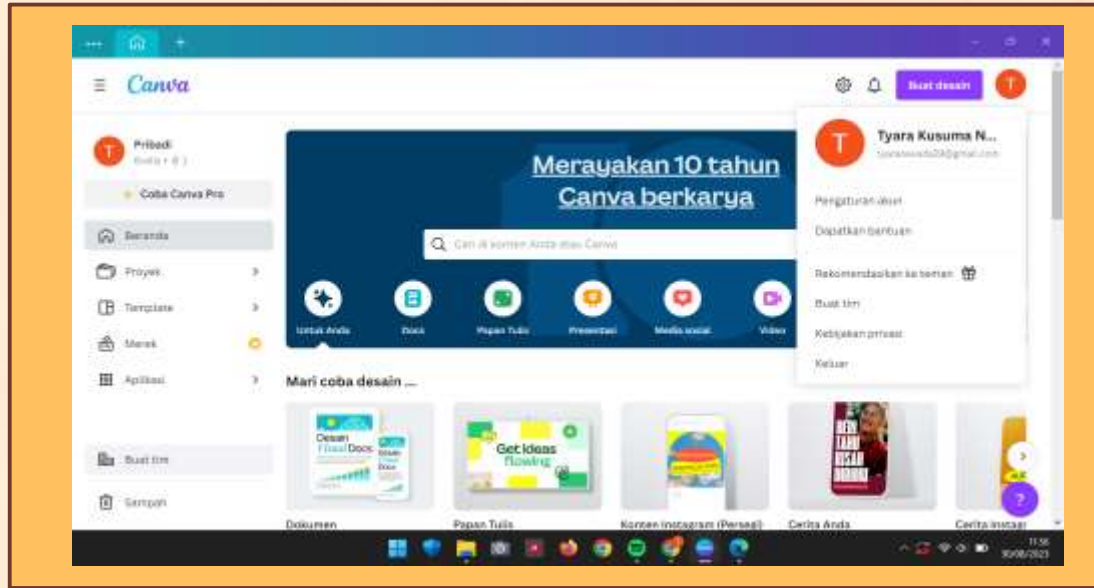

After successfully registering or logging in, there will be a notification like this

**Finished.**

**Finally, you  
can use the  
application  
according to  
your  
requirement**
