# UNIT 2 Computer Architecture

Picture 2.1

### **Learning Outcomes**:

By the end of the lesson, the students are expected to be able to use appropriate English to:

- identify and describe kinds of computer
- read a computer advertisement
- identify parts of computer
- describe functions of parts of computer
- identify comparatives and superlatives
- identify phrases used for presentation
- perform a presentation using phrases explained
- compare and contrast computers and any other devices using comparative and superlatives

.....

#### 2.1. Reading a computer advertisement

**Exercise 1:** You are going to listen to an extract from an ICT class about **five** types of computer.

As you listen, identify the pictures (a-e) with words from the box.

Picture 2.2

<u>Exercise 2</u>: Listen again and decide whether these sentences are true or false. Correct the false ones.

- 1. A mainframe computer is less powerful than a PC. (T/F)
- 2. A mainframe is used by large organizations that need to process enormous amounts of data. (T/F)
- 3. The most suitable computers for home use are desktop PC. (T/F)
- 4. A laptop is not portable. (T/F)
- 5. Laptops are not as powerful as desktop PCs. (T/F)
- 6. Using a stylus, you can write directly onto the screen of a tablet PC. (T/F)

- 7. A Personal Digital Assistant is small enough to fit into the palm of your hand. (T/F)
- 8. A PDA does not allow you to surf the Web. (T/F)

**Exercise 3**: Match these names to the different types of computer.

Picture 2.3

- 1. minicomputer 3. tablet 5. PC
- 6. supercomputer/mainframe 2. laptop 4. microcomputer

☐ internet

Exercise 4: Listen to Part 1 of the conversation between a shop assistant and a customer. Tick

 $(\sqrt{})$  the correct answers to the questions below.

☐ writing

- 1. The customer wants a computer for......

  - ☐ graphics □ video

□ games

2	. /	A multimedia computer provides			
		□ sound			telephone
		$\square$ graphics			video
		☐ games			
Exer	cise	5: Listen to Part 2 of the conve	ersat	ion.	In column A, tick hardware items named. In
colu	mn	B, tick the items the assistant re	ecor	nme	nds
cora		b, trok the reems the assistances			1100.
Α	В	Device	Α	В	Device
		multimedia computer			handheld
		multimedia notebook			printer
		subnotebook			monitor
		laptop			Modem
Exer	cise	<u>6</u> : Study the text entitled "Hov	v to	Read	d a Computer Ad" and then answer the following
ques	stior	ns			
	1.	What is the memory size of PC?			
	2.	What storage devices are supplied?			
	3.	What size is the display screen?			
	4.	How fast is the processor?			
	5.	. What is the capacity of the hard drive?			
	6.	Which operating system does it use?			
	7	. 0,			tanka
	7.	What multimedia features doe	es th	e co	mputer nave?

#### **HOW TO READ A COMPUTER AD.**

- Intel Core i7-9700K 9th Generation (Coffee lake). Base Clock: 3.6 GHz, Bus Speed: 800 MHz
- 2 Mini-tower chassis
- 3 16 GB dual channel DDR4 SDRAM
- 4 512 SSD & 2 TB Serial ATA hard drive (7200 r.p.m)
- 5 8 GB GDDR6 NVIDIA PCI-Express video graphic card
- 6 Integrated Dolby Atmos Stereo audio
- 7 Corsair K95 RGB Platinum Keyboard
- 8 42" TFT flat panel 4K (3840 x 2160) monitor
- 9 Microsoft Windows 10 Professional

Picture 2.4

- 1 The main processing chip called a 'core i7' that was designed and manufactured by the intel Corporation. It operates at a clock speed of threepoint six gigahertz and has a front-side bus that operates at a speed of eight hundred megahertz.
- 2 A small, tall and narrow style of case containing the computer system.
- 3 Synchronous dynamic random-access memory with a capacity of sixteen gigabyte. It is a high bandwidth, double data rate memory.
- 4 A Solid-state drive with a 512 gigabytes storage and a hard drive with a capacity of two terabytes that uses a type of connection interface known as Serial ATA. It has a serial data connection rather than the original parallel connection. It rotates at a speed of seven thousand, two hundred revolutions per minute.
- 5 Electronics for driving the graphics output that has a memory capacity of eight gigabytes and uses a type of connection interface known as PCI-Express.

- 6 Electronics for controlling the sound output that is built into the main electronics of the computer.
- 7 The K95 Platinum is a big keyboard. Dedicated media controls and a USB pass-through, a metal volume wheel, RGB lighting. It even comes with an extra set of textured keycaps for the WASD keys.
- 8 A forty-two inch, flat display screen made from thin film transistors with a resolution of 3840 by 2160.
- 9 The operating system that is used to control the system.

Oxford English for Information Technology (2011: 11)

#### 2.2. Describing functions of computer

We can describe the function of an item in a number of ways. Study these examples.

#### Using the present simple

1. ROM <u>holds</u> instruction which are needed to start up the computer.

## *Used to-*infinitive, *Used for + -ing* form

2. ROM is <u>used</u> to <u>hold</u> instructions which are needed to start up the computer.

3. ROM <u>is used for holding</u> instructions which are needed to start up the computer.

#### **Emphasizing the function**

4. The function of ROM is to hold instruction which are needed to start up the computer.

Exercise 7: Match each item with its functions. Then describe the functions in three ways as the examples on the table above.

Exercise 8: With your partner, describe the functions of these items using the forms you have learned before.

1. Scanner

6. ports

2. printer

7. mainframe computer

3. CPU

8. barcodes

4. SSD

9. swipe cards

5. hard disk driver

10. main memory

#### 2.3. Comparing and contrasting computer

**Exercise 9**: Study these details of different types of computer. Find answers to the questions.

Which computer is?

- 1. The most common?
- 2. Small enough for a pocket?
- 3. The most common portable?
- 4. Used by many people at the same time?
- 5. Used like mainframes?
- 6. Also called a handheld computer?
- 7. The most powerful?
- 8. Not suitable for a lot typing?

Types of Computer	Notes
Mainframes	Large, powerful, expensive.
	Multi-user systems – used by many people at the same
	time.
	Used for processing very large amounts of data.
	The most powerful mainframes are called
	supercomputers.
Minicomputers	Used like mainframes.
	Not as big, powerful, or expensive as mainframes.
	Less common now because microcomputers have
	improved.
Microcomputers or	The most common type of computer.
Personal	Smaller, cheaper, and less powerful than mainframes and
computers (PCs)	minicomputers.

Types of Portable	Notes
Laptop	About the size of small typewriter.
	Less common now because smaller and lighter portables
	are available.
Notebook	About the size of a piece of writing paper.
	The most common type of portable.
Subnotebook	Not quite as big as notebooks. Can fit into a jacket pocket.
Handheld or	Small enough to fit into the palm of one hand. Not easy to
Palmtop	type with because of their size.
	Specialized handheld computer known as PDAs are used as
	personal organizers.

**Exercise 10:** Study this comparison of three types of computer.

	Mainframes	Minicomputers	Microcomputers
Size	+++	++	+
Power	+++	++	+
Cost	+++	++	+

We compare things using adjectives in two ways.

1. We can compare one type of computer with another.

Minicomputers are **bigger than** microcomputers.

Mainframes are more expensive than microcomputers.

For negative comparisons, we can say:

Microcomputers are **not as big as** minicomputers.

Microcomputers are **not as powerful as** mainframes.

2. We can compare mainframes to all other types of computer.

Mainframes are **the biggest** computers.

Mainframes are **the most powerful** computers.

Mainframes are **the most expensive** computers.

With short adjectives (big, small, fast), we add -er and -est (faster, fastest).

With longer adjectives (powerful, expensive), we use more/less and the most/

the least before the adjectives (more powerful, the most powerful).

Remember some exceptions:

good – better – the best bad – worse – the worst

Exercise 11: Choose the correct adjectives. Then fill in the gaps with the correct form of the adjectives.

light/heavy	Laptops are <sup>1</sup>	than desktop computers, but
	² than no	otebooks.
large/small	The mainframes is the	e <sup>3</sup> type of
	computer. A minicompu	iter is <sup>4</sup> than a
	microcomputer.	
common/good	Personal computer a	are <sup>5</sup> than
	mainframes but mainfran	nes are <sup>6</sup> than
	personal computers at p	rocessing very large amounts of
powerful/expensive	data.	
	Minicomputers are <sup>7</sup>	than mainframes
fast/cheap	but they are also 8	
	New computers are <sup>9</sup>	and sometimes
powerful/expensive	10thai	n older machines.
	Laptops are often <sup>11</sup>	than PCs but they are
	not as <sup>12</sup>	_

## **Exercise 12**: Put the words in brackets into the correct form.

There are different types of computer. The (large) 1 and (powerful)
<sup>2</sup> are mainframe computers. Minicomputers are (small)
than mainframes but are still very powerful. Microcomputers are
small enough to sit on a desk. They are the (common) <sup>4</sup> type of computer
They are usually (powerful) <sup>5</sup> than microcomputers.
Portable computers are (small) <sup>6</sup> than desktops. The (large)
<sup>7</sup> portable is a laptop. (Small) <sup>8</sup> portables, about the size of
a piece of writing paper, are called notebook computers. Subnotebooks are (small)
9 than notebooks. You can hold the (small) <sup>10</sup>
computers in one hand. They are called handheld computers or palmtop computers.

## Exercise 13: In pairs, discuss who or what you think is:

- 1. The most difficult game you've ever played.
- 2. The most exciting film you've ever seen.
- 3. The funniest program on TV.
- 4. The most dangerous computer virus.
- 5. The best blogger or webmaster on the web.
- 6. The most popular web browser.

**Exercise 14**: Preparation is essential for an effective presentation. Here are some phrases that can help you delivering a better presentation.

#### **Useful Phrases for Presentation**

When giving a presentation, certain keywords are used to signpost the different stages. It's a good idea to memories them and practice them so that they come to your mind easily during a presentation.

Useful Phrases for Presentation			
Starting the presentation	Explaining the purpose		
Good morning/good afternoon ladies and	The purpose of this presentation is		
gentlemen.	My objective is to		
The subject of my presentation today is	My main aim today is to		
What I'm going to talk about today is			
Stating the main points	Introducing the first point		
The main points I will be talking about	Let's start/begin with		
today are firstly, secondly, next,	I'd like to start by		
finally, we're going to look at			
Showing visuals	Moving on to the next point		
I'd like to illustrate this by showing you	Now let's move on to		
Referring to an earlier point	Summarizing		
Let me go back to what I said earlier about	I'd like to recap the main points of my		
	presentation. First I covered, then we		
	talked about and finally we looked at		
	• I'd now like to sum up the main points,		
	which were		

Conclusion Inviting	Questions
I'm going to conclude by saying that /	Finally, I'll be happy to answer your
inviting you to / quoting	questions.
• In conclusion, let me leave you with this	Now I'd like to invite any questions you
thought / invite you to	might have.
	Do you have any questions?

Exercise 15: Now put the following phrases in the correct groups. Add some more phrases that you know.

- In conclusion, let me leave you with this thought / invite you to ...
- Good morning/good afternoon ladies and gentlemen.
- The main points I will be talking about today are firstly ..., secondly ...., next ...., finally, we're going to look at...
- I'm going to conclude by ... saying that / inviting you to / quoting ...
- Now let's move on to ...
- My objective is to ...
- Finally, I'll be happy to answer your questions.
- Now I'd like to invite any questions you might have.
- What I'm going to talk about today is ...
- The subject of my presentation today is ...
- I'd like to illustrate this by showing you ...
- I'd like to recap the main points of my presentation. First I covered ..., then we talked about ... and finally we looked at ...

Useful Phrases for Presentation			
Starting the presentation	Explaining the purpose		
Stating the main points	Introducing the first point		
Showing visuals	Moving on to the next point		
	·		
Referring to an earlier point	Summarizing		
Referring to an earlier point	Summarizing		
Conclusion	Inviting Questions		

Picture 2.5

Exercise 16: In pairs, find two different advertisements of PCs/laptops/any gadgets and write some comparisons (at least 10 sentences) based on their specifications and present it in the class. Use the phrases that you have learned today.

## Look at the example below.

## **Example of Writing a Comparison between Two Things**

- 1. Samsung Galaxy Note 10+'s size is bigger than iPhone XS Max's.
- 2. The storage of Samsung Galaxy Note 10+ and iPhone XS Max has the same capacity.
- 3. The price of Samsung Galaxy Note 10+ is more expensive than iPhone XS Max.
- 4. ....
- 5. .....
